Safety Instructions for Waste Collection Operators

Take care when moving loaded wheeled bins. Avoid awkward postures, twisting and using excessive force.

Hand and foot protection must be worn.

Wash hands after handling wheeled bins.

Pre-Operation Safety Checks

For hygiene and safety reasons, lids should never be permanently propped open.

Do not climb into or onto bins.

Test the weight of the wheeled bin before moving.

Avoid overloading bins and do not handle overloaded bins.

Do not handle multiple bins at once.

Keep wheels free from debris which may hinder rolling.

IPL recommend waste collectors introduce processes and procedures to assist in health and safety.

Operation Safety Checks

Do not move multiple bins at once or moving heavy /overfilled bins as back and shoulder injuries may occur.

Take care when moving bins up or down inclines. Use flattest route possible.

Push bin with two hands. Note that on loose surfaces (such as gravel) it may be easier to pull the bin.

If moving the bin up or down stairs or kerbs, make sure the bin is below you.

Never empty a wheeled bin by hand or manually lift a bin to empty it.

Emptying must be carried out by an EN1501 certified bin lifter.
